

# Latchways Personal Rescue Device

## Ease of use

The patented Latchways componentry has been designed to fit neatly into the 'backpack' to ensure the worker can safely go about their daily work. The 'backpack' zips onto the harness so that it becomes part of everyday work wear for those who work at height. The harness is lightweight and unobtrusive but also robust, ensuring it can withstand the rigours of the harshest working environments.

## Rescue benefits

- Significantly reduces rescue time
- Always available
- Self-activated
- Intuitive use
- Clear rescue plan
- Improves user safety

## The PRD range

The PRD is available in two harness types, RH2 and RH3.

**PRD RH2**

20 m (65 ft) descent device, backpack and 2-point harness with chest D-ring.

**PRD RH3**

20 m (65 ft) descent device, backpack and 4-point harness with front D-ring, plus work positioning belt with side D-rings.

## Rescue Pole

The Latchways Rescue Pole is designed to be used by a third party. Should the user be unable to conduct a self-rescue, the third party can activate the PRD's built-in secondary descent release mechanism.
